# Germ-Free Holiday Travel: We've Got This in the Bag

We love to travel—seeing friends and family, eating in new restaurants, seeing the sights—just getting out of the day-to-day grind. But one thing that can really hamper your vacation plans: Getting sick en route.

You probably know that planes are essentially giant petri dishes full of germs, and so are hotels, cruise ships, trains, buses, and cars. This holiday season, we're prepared, because now we have PlaneAire™ Surface & Air Purifying Travel Mist.

**This spray** kills 99.99% of illness-causing bacteria on seats, in restrooms, on tray tables and everywhere else, all with a potent non-toxic blend of 100% pure certified-organic essential oils and ingredients derived from organic fruits. The proprietary formulation uses oils specifically selected and layered to maximize their antiviral, antimicrobial and antifungal superpowers—and yet all they leave behind is a soothing herbal scent. So you can relax knowing you're protected from germs, and enjoying the fresh all-natural fragrance while you're on the road.
